SETH WAY · software engineer

570-419-2673 · way.sethaniel@gmail.com · sethway.vercel.app · linkedin.com/in/sethway · github.com/seth-way

CAREER SUMMARY:

Web Developer with hands-on experience designing, building, and testing complex web applications. Passionate about creating software solutions that are fluid, thoughtful, and user centric. Military Veteran with technical training from both the Microsoft Software & Systems Academy and The Turing School of Software Engineering.

SKILLS:

React · TypeScript · JavaScript (ES6+) · Java · React Hooks · NextJS · Webpack · React-Router · RESTful APIs · Spring Boot · WebSockets · Tailwind CSS · HTML5 · CSS3 · Node.js · Git · E2E Testing (Cypress) · TDD (Mocha, Chai, JUnits) · Data Visualization (ReCharts)

RELEVANT PROJECTS:

React Spinning Border · github.com/seth-way/react-spinning-border

- Published a reusable, lightweight npm package (react-spinning-border) that achieved 300+ downloads within its first week, showcasing its demand and accessibility.
- Built with TypeScript, styled with TailwindCSS, and animated using Motion, ensuring a customizable and visually engaging component for React applications.
- Designed a comprehensive Storybook demo and documentation, providing detailed API references, usage examples, and customization options for developers.

Chess with Frien-emies · github.com/seth-way/chess_fe_microservice

- Developed a React-based microservice offering a real-time, multi-user chess experience using WebSocket connections and assignable rooms.
- Deployed the microservice as a standalone or consumable endpoint, enabling seamless integration into other applications.
- Designed and documented detailed architecture diagrams, outlining dataflow, logic, and JSON contracts for multi-level microservice architecture.

6° of Kevin Bacon · github.com/seth-way/degs-o-kev-bacon

- Created a logic-intensive trivia puzzle challenge with a custom Node/Express RESTful API, dynamically delivering personalized puzzles to users.
- Enhanced user engagement with DnD-Kit drag-and-drop hooks, ensuring intuitive gameplay and minimizing learning curves.

WORK EXPERIENCE:

Allstate Insurance Company · Full Stack Engineer · *3/2025 – present*

- Contributed to end-to-end development of a customer-facing digital insurance product, collaborating across planning, testing, implementation, and post-deployment support, helping reduce incident rates by 30%.
- Built and debugged RESTful APIs using Spring Boot, resolving critical bugs and reducing runtime errors to below 5%, resulting in more stable feature rollouts.
- Used Test-Driven Development (TDD) in pair programming sessions to increase unit test coverage from ~70% to over 95%, improving code reliability and reducing QA regression time.

United States Army · Sergeant / Squad Leader · *6/2014 – 11/2019*

- Supervised a team of five in completing work orders in a metal fabrication shop. Held authority over quality control and taskings.
- Mentor & manager to a team of 4-8 members with responsibility for their technical and career development.
- Managed & delivered on approximately 100 project deadlines in a demanding, fast-paced environment that required balancing work schedules with extensive military training demands.

EDUCATION:

The Turing School of Software & Design · *2024*

Front End Software Engineering · *9-month Engineering School* ·Student Leadership Council

Microsoft Software & Systems Academy · *2019*

Microsoft Software Associate (MTA) - Software Development Fundamentals · *19-week Course*

AWARDS / PARTICIPATION:

Army Commendation Medal (X2) · Army Achievement Medal (X2) · Army Good Conduct Medal · National Defense Service Ribbon · Non-Commissioned Officer Professional Development Ribbon · Overseas Service Ribbon · Parachutist Badge
